GEARWRENCH®

PITBULL™ PLIERS GUIDE

New GEARWRENCH PitBull™ pliers are cutting and gripping machines. PitBull Auto Bite™ pliers feature one-handed automatic gripping action, so they're perfect for tough work in tight spaces, while PitBull Tongue and Groove pliers have a K9™ jaw that bites hard to grip strong, even when attacking at an angle. If superior cutting's your thing, PitBull cutting pliers deliver big time with 35% less force needed to cut and 50% longer blade life. When it comes to unstoppable gripping and cutting performance, nothing beats GEARWRENCH PitBull pliers.

PitBull **AUTO BITE™** Pliers

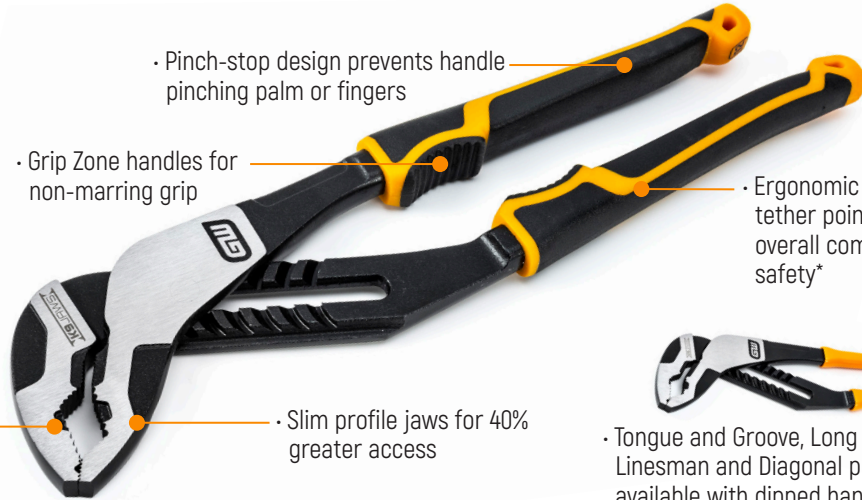

True one-handed automatic adjustment and slim design make these pliers perfect for work in cramped, hard-to-reach spaces. Just flip the patented Auto-Bite lever with your thumb and squeeze the handles to fit the jaws securely around any object. Auto-Bite's aggressive tooth design grips tight for maximum turning power then releases just as easily.

- Aggressive angled teeth for increased grip
- Slim profile jaws for 40% greater access
- More jaw positions for more flexibility, grip comfort and jaw capacity
- With the Auto-Bite lever engaged, squeeze the handles and the jaw automatically adjust to a strong grip
- Grip Zone handles for non-marring grip
- Pinch-stop design prevents handle pinching palm or fingers
- Ergonomic handles with tether point increase overall comfort and safety*

Cat. No.	Description	Jaw Positions	Overall Length	Jaw Length	Jaw Width	Jaw Thickness	Jaw Capacity	Jaw Type	Weight [lbs]
